Patient: Jason Khan
Birth Date: 6 August, 1978

Follow Up - Post Arthrocentesis + Botox

Patient back for follow up post bilateral arthrocentesis + 100u botox to bilateral temporalis and masseters.

Surgery Date: June 17 with Dr. Touchan.

Patient is 3 months post operative.

Subjectively:

Patient symptoms: feels great especially the joint space reduction in pain and nocturnal bruxism reduced

On Exam:

Swelling: none
Bruising: none
No signs of infection
ROM: 35mm mouth opening
Bilateral TMJ tenderness

Plan:

1. Observe for 6 months to a year and if symptoms reoccur or persist will require other procedures.
2. Recommend another dose of botox injections to be scheduled for 110u botox to 2 muscle groups (bilateral temporalis and masseters)
